

BP Scoring, Powered by Chronotopology.

A risk-evaluation engine that maps every founder's pitch to a 5-dimensional vector — Timing, Location, Team, Pattern, Anchor — and returns a 0–100 Alpha Score in 30 seconds. No deck review meeting required.

01 English Landing Input Page Silicon Valley locale · en-US · America/LA tz

The dashboard presents two intake modes (**Form · Structured** and **Text · Free BP**) with project name, sector, founded date, founder count, funding round, target market, and key risks — all English UI designed for global VC.

✓ CONFIRMED

Live capture: real Chromium session running with **en-US locale** fills a representative AI inference startup pitch. **Founded · Year/Month/Day** is now 3 selects (no native date-picker locale pollution). Key risks capture GPU supply and API cost constraints typical for the sector.
